PROFESSIONAL SUMMARY

Computer Science student (UNLP, 3rd year) focused on backend development. Experienced building web applications with JavaScript, TypeScript, React and Node.js, applying modular architecture, separation of concerns and clean code. Familiar with REST APIs, frontend-backend integration and modern development workflows. I integrate AI tools into my workflow to speed up debugging, refactoring and documentation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python

Backend: Node.js, Express.js, Spring Boot, REST APIs, modular architecture

Frontend: React, HTML5, CSS3, Tailwind CSS, Vite

Databases: MySQL, SQLite, SQL

Tools: Git, GitHub, Postman, Vercel

Concepts: OOP, data structures, clean code, API design

AI / Productivity: ChatGPT, Claude, Copilot, Gemini (debugging, refactoring and documentation)

Languages (spoken): Spanish (native), English (intermediate – fluent technical reading)

PROJECTS

Gym Management System | *React · TypeScript · Tailwind CSS · Vite · Mercado Pago · JWT · SQLite*

Completed • *Group academic project – Software Engineering II (UNLP)*

- Requirements gathering with a real client, full specification (SRS, epics, user stories) and risk analysis
- Built the payment module with Mercado Pago, the QR-based attendance system and the points exchange feature
- Integrated with the team's backend via REST API
- Frontend in React + Tailwind CSS with JWT authentication and role-based access control (client, receptionist, owner)
- Collaborative development with Git Flow: feature branches, PRs and team coordination

Live: <https://sistema-cef.vercel.app/> | **GitHub:** <https://github.com/canizafa/sistema-cef>

Articles REST API – E-commerce | *Java · Spring Boot · MySQL · JPA/Hibernate · Maven*

Individual project – Talento Tech (Ministry of Education, Buenos Aires)

- REST API with full CRUD on the Article entity: GET, POST, PUT and DELETE
- Layered MVC architecture: Model, Repository (JpaRepository), Service and implementation, Controller
- MySQL persistence with JPA/Hibernate; environment variables for database credentials

GitHub: github.com/facu-l/entrega_final_26139_facundolambertucci

Landing Page – Personal Trainer | *React · Vite · TypeScript · Tailwind CSS · Vercel*

Deployed to production

- Responsive web application built with React, Vite and Tailwind CSS
- WhatsApp integration for lead capture (CTAs per plan)
- Contact form with Web3Forms, environment variables and basic SEO optimization
- Deploy to production on Vercel with Lighthouse audit

EDUCATION

Bachelor's Degree in Computer Science

School of Computer Science – National University of La Plata (UNLP)

2017 – Present (*in progress, 3rd year*)

CERTIFICATIONS

Back-End / Java – Talento Tech

Ministry of Education – City of Buenos Aires (Buenos Aires Aprende)

July 2026 • 80 clock hours

- Built a REST API with Spring Boot and MySQL for ecommerce
- frontend-backend integration in a complete Java project
- Object-oriented programming fundamentals in Java applied to backend

Soft skills: Problem solving • Fast learning • Teamwork • Autonomy • Organization
